13. Legal claims

On June 13, 2017, the Parent Company submitted a financial claim for KD 25,415,961, which is currently under the consideration of the Public Authority for Industry and the Ministry of Commerce, who referred the matter to the Council of Ministers, who in turn referred it to a competent committee to assess the compensation. The management believes that the Parent Company is eligible for compensation by the principles of compensation established by Law No. 105/1980 regarding state property and its executive regulations and also based on the contract concluded by contract no 27/103 dated September 19, 2013, with the Public Authority for Industry regarding the exploitation of the land, according to similar cases in the same geographical location.

In a meeting held on September 29, 2019, between the Parent Company and the Public Authority for Industry, it was decided to provide alternative land to the Parent Company for shifting its administrative building, factory, and scrap yard from South Amghara and that the transfer to the new site will take place only after the installation of power, and implementation of organizational structure. However, the Administrative Authority issued an order on January 25, 2021, to displace the Parent Company from this land before alternate arrangements were completed, violating the original decision.

Accordingly, the Parent Company considers that the Administrative Authority's violation has caused further damages, so it prepared a supplementary financial claim to the previous one, bringing the total claim to KD 58,500,000.

The matter was further taken to the Court of Law, where on June 22, 2022, the First Instance Court ruled accepting the claim in form and rejected it in substance. The Parent Company appealed the ruling before the Court of Appeal, which was held on November 21, 2022, and ruled to accept the appeal in form, reject it in substance, and uphold the appealed judgment. As a result of the Court of Appeal ruling, the Parent Company filed an appeal before the Court of Cassation, where multiple sessions were held with no ruling being issued till date; the latest is scheduled to take place on September 18, 2024.

15. Fair value of financial instruments

The Group measures financial assets at fair value at each reporting date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability.
- In the absence of a principal market, in the most advantageous market for the asset or liability

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1: Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- Level 2: Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable.
- Level 3: Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

The following table shows an analysis of captions recorded at fair value by level of the fair value hierarchy:
